

IMGING

# The Leading Drone Roof Inspection Solution

## Drone Inspection

IMGING lets you inspect roofs and properties with an automated drone in as little as five minutes. You can gather, view, and annotate ultra-high-res roof and property images, view 3D models, get measurements of every facet, and use the info as part of a detailed bid.

### Increase Close Rates

Wow customers and carriers with to-the-nail accurate, polished bids.

### A.I. DAMAGE DETECTION

Use unbiased A.I. to highlight damage and differentiate your bids.

### MEASUREMENTS

Explore and review inspection-grade 3D models for any measurement you need.

## Handheld Inspection

Use an iOS mobile device and turn data into insights, urgency-driving inspection reports, and work-winning bids.

### Inspect List

Organize exterior and interior photos for greater collaboration.

### A.I. Damage Detection

Use deep learning to identify damage.

### Smart Photo Location

See the location of any photo taken.

## Speed Squares

For a quick bid, you need quick measurements. Speed Squares gives the total squares of a roof in a few seconds, so you can write rough bids whether you're on-site or not. Speed Squares is a free tool included in the IMGING inspection platform.

## IMGING ON DEMAND

IMGING On-Demand delivers property data for a fraction of what you'd usually pay. We use drones, A.I., and certified pilots to get you the info you need to make a decision about a roofing estimate, insurance claim, or bid in just a few days. Ideal for those "steep and high" jobs.

Tell us where and when you need an inspection.

We'll send a pilot to fly the home and gather imagery.

Within a few days you'll get access to the images and measurements in the IMGING app along with the ability to create rock solid inspection reports, roof reports, and bids to help you close more business.

## About Loveland Innovations

We help construction companies by giving new ways to gather and analyze property data. IMGING lets users create a comprehensive, up-to-the-second digital version of a whole property. Using this detailed digital version of a structure, users get new ways to document, explore, measure, and analyze them. This helps you improve your sales workflow, allows for more complete approach to property management, and much more.
